Product-Information

H₂Oil

1. Product description

Water based care oil on a natural basis, for freshening up all oiled wood and cork floors. Gives the floor a pleasant, silk matt look. Regular cleaning of the freshened up wood, or cork floor with Wood care for oiled floors becomes easier and provides optimal protection.

2. Areas of Application

For oiled wood and cork floors, whether oil was applied by the manufacturer or since by a floor specialist. Observe the care instructions specific to the floor covering. Not suitable for white-pigmented surfaces.

3. Method of Application

For the final cleaning in a building, clean an averagely dirty wood or cork floor in advance with Wood care for oiled floors, combined with a green pad. In the case of a heavily soiled floor, or a floor with a thick residue of past care products, clean in advance with an intensive cleaner, in a dilution of 1:1 up to 1:3 with water, using a green pad.

After the surface has completely dried, it can be freshened up with H₂Oil. Before opening, ensure that the contents of the canister are well shaken. Then apply H₂Oil undiluted with a dry Polish Applicator, or a dry, fluff free Wide Mop in an evenly thin film onto the thoroughly cleaned floor. Allow the surface to dry for at least 12 hours before application.

Notes: Turn off under floor heating beforehand when applying H₂Oil, avoid strong sunlight and draughts. After use, carefully rinse the applicator or mop directly with clear water, then wash it out thoroughly with a cleaning solution (e.g. intensive cleaner).

Consumption: 20-25 g/ sq.m per application (depending on absorbency of the surface).

4. Technical Data

pH level: approx. 6,0

Ingredients: CHLOROMETHYLISOTHIAZOLINONE, METHYLISOTHIAZOLINONE, BRONOPOL, linseed oil components, perfumes, solvents, care components.

Cloths or pads containing the remains of H₂Oil can self-ignite if heat builds up while they are drying. They should therefore be spread out to dry and only disposed of once completely dry

Store H2Oil closed in the original container in a cool and dry place. Keep locked up and out of the reach of children. Protect from frost!

5. Unit Sizes

750 ml - bottle
