

Did you know you can
renovate sports floors,
without tearing them out?

SIMPLY RENOVATE SPORTS FLOORS ...

With the Dr. Schutz Sport Floor System worn sports floors can be renovated in color or transparent without great expense and hardly any downtime.

Works on all types of sport floors: Sport linoleum, vinyl, PU resin and wood floors.
Fulfills the international EN-14904 norm for sport floors.

... AND RE-DESIGN THEM

With lines for individual sports or multisport floors, club logos or school coats of arms.

Lines are refurbished during the renovation and then permanently protected from fading and scuffing with a transparent on top coating.

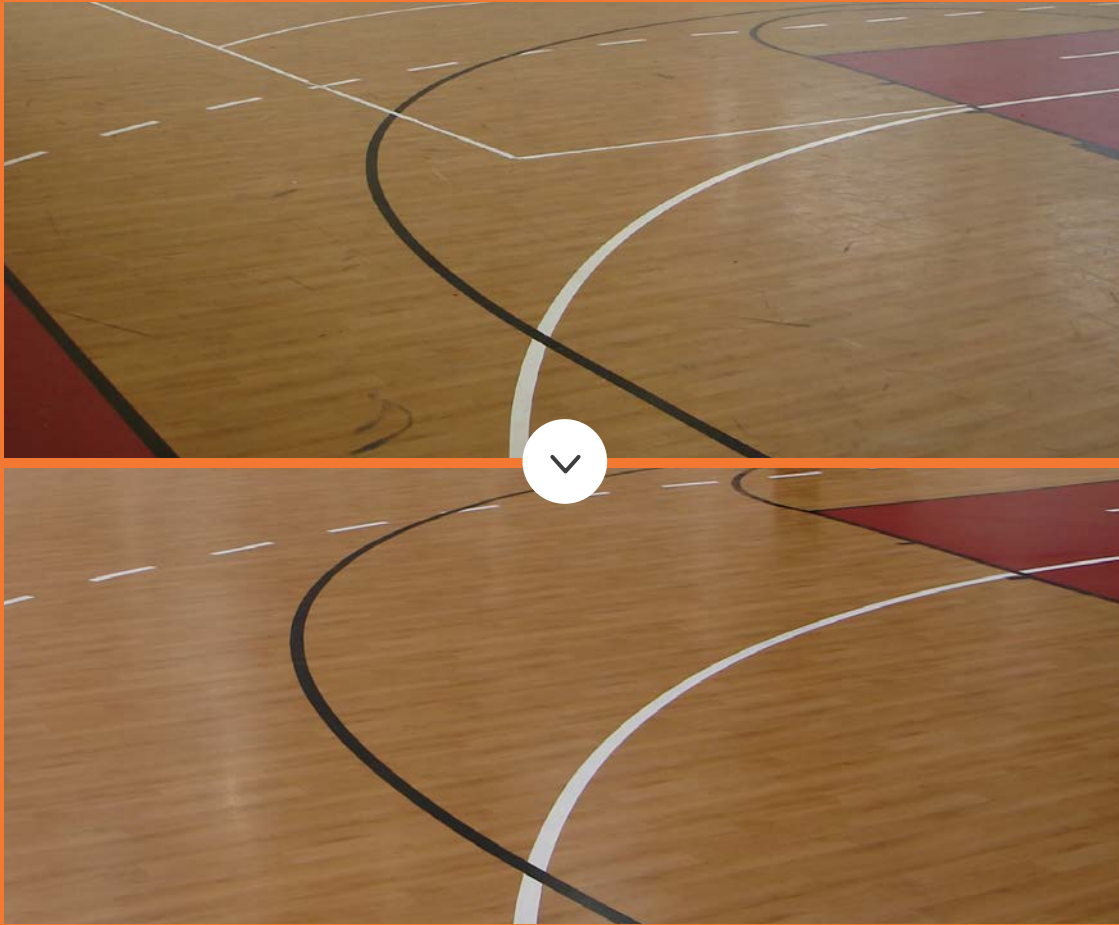

Club logos or school crests can be incorporated on the floor and are a real eye-catcher.

Changing rooms are also optimally protected.

OLD SPORTS FLOORS LOOK LIKE NEW AGAIN

Worn sports floors can also be refreshed by applying new lines and a transparent on-top coating, without changing their original designs.
