

Dr. Schutz®

PERFECTLY CHIPPED IN A SHORT TIME

Creative floor design with Dr. Schutz

THE DR. SCHUTZ CHIPPER AND SYSTAINER: A PERFECT TEAM

THE ADVANTAGES AT A GLANCE

- ✔ Technical power: 800 W, weight 5 kg, can be used from -10° to +40° Celsius
- ✔ Smoothly regulated air-flow -> for an individually dense or loose chip image, according to the customer's desires
- ✔ 50% time saving
- ✔ perfect results: consistently regular chip image, reproducible
- ✔ No forming of spots or clouds
- ✔ Regular combinations of different colours and sizes of chips are possible
- ✔ Delivered as a perfect system, including two systainers for optimal packing and transport

Your professional chipper is perfectly packed and delivered, including two modular container-system boxes. The boxes can be assembled, stacked and connected to all other common systainers, due to the universal T-Loc system used. The systainers protect your chipper optimally from any damage en route to the construction or renovation site.

THE DR. SCHUTZ CHIPPER-PRO VERSUS STREWING BY HAND: **THE DIRECT COMPARISON**

Strewing by hand

Without the Dr. Schutz Chipper this can lead to an overdose of chips, which forms clouds, clusters and irregular spots.

Strewing with the Dr. Schutz Chipper

50% time saving by strewing the chips with the chipper. Guaranteed uniformly scattered, reproducible results every time, no forming of spots. Regular mixing of differently sized and coloured chips is possible - no problem.

EXTRA PRACTICAL: PLENTY OF SPACE FOR THE SAFE TRANSPORTATION OF THE CHIPS NEEDED ON SITE

**A Dr. Schutz®
ESSENTIAL**

The Systainer System: the number one world-wide

The systainer - not just a case, but also a system! Created as a result of the demand for working materials and tools to be transported safely, in a clearly structured order and, above all, time-saving. The patented case system, made of ABS synthetic material (with the highest strength, stable shape, shock-proof and protected against dust and water-splashes), can be stacked and combined.
