*1: PU Sealer is available in different gloss grades (mat, satin, gloss). *2: Depending on the use of colored or transparent disinfectants. *3: In areas requiring a higher level of slip resistance (R10) we recommend to add the Antislip Additive to PU Sealer. *4: In areas where sand is brought into the building (e.g. kindergardens) we recommend the use of Secura. *5: Only suitable for non water soluble stains (e.g. chewing gum, oil, tar etc.).
