# TERRACES WHICH REMAIN LOVELY

Dr. Schutz offers the perfect, easy care for terraces, furniture and more in outdoor areas.

Dr. Schutz - a brand of Dr. Schutz® GROUP

Art. Nr.: 6000906501 GB-04/16

# OPTIMAL LONG-TERM PROTECTION

For hard-wearing wood  
Naturally beautiful in every form

Wooden surfaces have a special appearance owing to their structure and grain. So that weather and wear do not damage this lovely appearance, care oils help to protect the wood. Therefore wood remains as it is supposed to be, naturally lovely, in every form.

**Bangkirai Oil** impregnates all wooden surfaces, penetrates well, remains open-pored and allows the wood to breathe, accentuating the natural beauty and structure. It is also suitable for wooden furniture in outdoor areas and even provides anti-slip safety in accordance with R10 standard.

**Terrace Oil** works in the same way, supporting the natural appearance of wooden surfaces.

# EASY CARE - THE EASY WAY TO LOOK AFTER YOUR TERRACE

In spring fit for the warm days,  
in autumn ready for winter

**Easy care** is a water-based care-emulsion for wooden terraces. It provides UV-protection and high resistance to chemicals. Apply **easy care** after oiling the wood (please observe the drying time) with Dr. Schutz Outdoor-Oils. When applied regularly the intervals until the next oil treatment are extended. **Easy care** can also be used to impregnate untreated wood.

**Easy care** is available as pigmented for dark wood and unpigmented for light wood. **Easy care light** is also the perfect care-emulsion for WPC terraces. **Easy care light** is applied without oiling beforehand.

# THE BEST CLEANING FOR TERRACES TO LOOK ADORABLE

For a natural, lovely appearance,  
like on the first day

Whether made of wood, stone, concrete or tiles – in summer terraces become a kind of living room. So that their beauty is not lost due to heavy soiling from dirt, stains, weathering, grey tinge or green plaque, Dr. Schutz has developed a cleaning system especially for outdoor areas. The system is tailored to the various surfaces and types of soiling and protects these favorite places, so that you can let yourself relax there, without a care in the world.

**Outdoor Wood Refresher** counters greying and lightens all wooden surfaces again. Subsequent oiling brings out the natural colour again.

**Intensive cleaners** remove dirt thoroughly, powerfully and gently, while also removing signs of weathering. After allowing it to soak in for a short time, even stubborn stains on stone, wood and WPC become a thing of the past.
