Product-Information

Concentrated Carpet Cleaner

1. Product Description

For the fibre-deep cleaning of synthetic fibre carpets and upholstery. The new fresh-up formula guarantees fresh air within rooms and eliminates unpleasant smells such as nicotine. With integrated stain remover and foam blocker.

2. Areas of Application

Colour fast and water resistant carpets and upholstery.

3. Method of Application

First vacuum clean the carpet thoroughly by use of a powerful brush vacuum cleaner (e.g. Tebo Brush Vacuum Cleaner). In case of sensitive carpets use a regular but still effective vacuum cleaner. For normal soiling dilute Concentrated Carpet Cleaner in the mixture of 1:60 to 1:70 (give 150 ml to 10 litres water). For extreme soiling add more of the concentrate. Give cleaning solution into the fresh water tank of a spray extraction machine (e.g. Sprayboy 2000 or Premium F1/F2) and clean the carpet according to the advice specified on the cleaning appliance.

Consumption: 1 l = 80 m²

Note: Beware of soaking when treating carpeting and upholstery which are sensitive to moisture (due to carpet characteristics or method of installation) and carpeting with pile not suitable for the application of mechanical treatments. Before use, test the surface to be treated in an inconspicuous spot for colour-fastness and material suitability. Check to ensure that the carpet has been laid down with water-resistant adhesive. Do not spray sensitive surfaces (e.g., wood, metal, varnished surfaces) with the cleaning solution.

4. Technical Data

pH level: 7.5 (concentrate)

Data on ingredients (EC recommendation): less than 5% anionic surfactants, soap, non-ionic surfactants, NTA (nitrilotriacetic acid). Contains preservatives, perfume, LIMONENE, solvents, care components.

Concentrated Carpet Cleaner should be stored in a cool, dry place in its closed original container. Protect from frost. Keep locked up and out of the reach of children.

Concentrated Carpet Cleaner

5. Quality Assurance:

Certified in Germany by the Forschungs- und Prüfinstitut für Facility Management GmbH, Metzingen (FIGR)

5. Unit Sizes

20 x 750 ml bottles
5 l canister

Art.-No. 382075016
Art.-No. 138200501

The above advice on procedure for use is based on the best of our knowledge and the latest information available on cleaning technology. For this reason, when using our quality products, no damage will be incurred to the materials to be cleaned if strict attention is paid to the instructions printed on the container and the procedure suggested by us is followed. The use to which our products are put is, however, beyond our control. It is the responsibility of the user and does not release the user from making his own checks of the products supplied by us as to their suitability for the intended procedure and purposes. The information supplied by us is therefore non-binding and cannot be used as a basis for establishing the company's liability for any damage incurred. This also includes the infringement of any rights for the protection of third parties.
