Product-Information

Floor Cleaner R 1000

1. Product Description

Special wipe-over care product for the routine cleaning and care of resilient floors. Based on water-soluble environmental friendly care components. Cleans and protects the floor in one step. Creates an antislip and satin protective film. Application concentration pH neutral. Can be used in combination with a cleaning machine such as the Premium F 2. Also recommended for the initial protection of structured rubber floors.

2. Areas of Application

Vinyl, linoleum and rubber floors. Complies with the requirements of DIN 18032 for floors in sports areas, gyms, etc.

3. Method of Application

Initial care in high traffic areas:

If no polymer dispersion can be used for the initial care of the floor, dilute R 1000 Floor Cleaner in a ratio of 1:10 (1 l to 10 l of water) and wipe over the cleaned floor with the solution. Polish up the resultant protective film with the Monodisc SRP 2+S with polishing pad or polishing brush.

Consumption: 1 l = 50 m²

Routine cleaning and care:

Dilute R 1000 Floor Cleaner in a ratio of 1:200 (50 ml to 10 l of water) and wipe over the floor with this solution. Leave to dry remaining moisture. Cleans and protects the floor in one step. The dilution can be increased up to 1:400 (25 ml to 10 l of water) for grained floors and in cleaning machines.

Consumption: 1 l = 1000 m²

Note: Regular polishing increases the resistance of the protective coating especially in high traffic areas. Pay attention to exact quantities. Repeated over-dosage of R 1000 Floor Cleaner or the accumulation of moisture on the treated surface can lead to an increase in surface friction and thus to a reduction in anti-slip qualities.

4. Technical Data

pH-level: 7.5 (concentrate)

Product code for cleaning and care products (Giscode): GE 30

Data on ingredients (EC recommendation): less than 5% anionic surfactants. Contains BENZISOTHIAZOLINONE, METHYLISOTHIAZOLINONE, perfumes, LIMONENE, solvents, care-components.

Floor Cleaner R 1000 should be stored in a cool, dry place in its closed original container. Keep locked up and out of the reach of children. Protect from frost.

5. Quality Inspection

Certified in Germany by the Otto-Graf-Institute for material testing, University of Stuttgart, Germany, section 46 sport floors.

6. Unit Sizes

15 x 750 ml bottle

5 l canister
