

Elatex/USR Universal Stain Remover

1 PRODUCT DESCRIPTION

A universal agent for the removal of rubber marks, heel marks, adhesive residue and stubborn stains.

2 AREAS OF APPLICATION

Resilient floors (vinyl, linoleum and rubber), laminates, sealed wood and cork floors, as well as carpets and upholstery.

Please pay attention to our technical instructions specifically for floors and buildings under www.dr-schutz.com

3 METHOD OF APPLICATION

A. Resilient floors, laminate, wood and cork floors: For floors without a polish or sealer spray Elatex directly onto the soiled area. Leave to react for a short time, treat residues with a cloth or non-abrasive white pad. Finally wipe with clear water. Avoid long-lasting action on polymer-coated floors as well as sensitive surfaces (e.g. sealed wood and cork floors). In such cases spray Elatex onto a cloth and take up loosened stains carefully. Thereafter treat the floor with a suitable care agent.

B. Textile floors and upholstery: Spray Elatex directly onto the stain and leave to draw for some minutes. Then loosen the stain by dabbing it with an absorbing cloth, working from the edges of the stain towards the centre. Remove loosened dirt by dabbing with a dry part of the cloth. Then treat with clear water and subsequently dab dry. If necessary, place the cloth on the treated area, weight it down somewhat and allow it to stand for a time until the liquid has been removed completely from the carpet.

Note: Do not inhale fumes. Before use, test the flooring with Elatex Stain Remover at an inconspicuous area for colourfastness, water resistance and material suitability. Reactions in the carpet fibres caused by the presence of stains may limit the effectiveness of Elatex Stain Remover.

4 CONSUMPTION

As required.

5 STORAGE

Elatex Stain Remover should be stored in a cool, dry place in its closed original container. Protect from frost. Keep locked up and out of the reach of children.

Elatex/USR Universal Stain Remover

6 TECHNICAL DATA

Ingredients: less than 5% bleach agents based on oxygen, solvents.

pH level: 5.5 (concentrate)

ADR/RID: not a dangerous good as defined by transport regulations

CLP: The product is not classified according to the CLP regulation.

Even when using low-pollution products, the usual safety measures are to be observed. Keep away from children. Completely emptied canisters can be disposed of in domestic waste, or taken to a recycling centre.

7 SPECIAL NOTES

Please pay attention to our technical instructions specifically for floors and buildings under www.dr-schutz.com
