

Floor Mate

1 PRODUCT DESCRIPTION

Universal stain remover for synthetic fibre carpeting. Its active oxygen component is also effective in treating intensively coloured stains such as red wine, fruit tea, curry etc.

2 AREAS OF APPLICATION

Synthetic fibre rugs, carpets and fitted carpeting. Also suitable for use on resilient floor coverings, laminate flooring and water-resistant surfaces (e.g., tables, cupboards).

Please pay attention to our technical instructions specifically for floors and buildings under www.dr-schutz.com

3 METHOD OF APPLICATION

First dab up liquids using absorbent cloths. Take up loose dirt with the vacuum cleaner.

Spray Floor Mate onto a soft, absorbent, non-linting cloth (e.g., a suitable micro-fibre cloth) and loosen the stain using a dabbing action, working from the outer edges towards the centre. Do not rub. Take up any loosened dirt with a dry section of the cloth. In case of stubborn stains, repeat the process as necessary. Finally treat the area once again with clear water and then dab dry. When treating fitted carpeting, spread out and weight down a dry cloth if necessary to soak up any remaining fluid. Use a suitable care product for the final treatment of resilient floor coverings on which care products have already been used.

Note: Before starting work, use Floor Mate at an inconspicuous place to check for colourfastness and material and paint / varnish suitability. Avoid allowing to stand for too long on sensitive surfaces (such as acrylic glass, varnished areas).

The effect of the product may be restricted if used to treat old stains that have become embedded in the flooring or respectively which cause a colour reaction.

Do not breath in fine spray and product vapours. During and after the use of larger quantities, ensure that the room is sufficiently well ventilated. Occasionally, in the case of prolonged or repeated contact, Floor Mate can give rise to a temporary whitish discoloration of sensitive or dry skin. For this reason, wear rubber gloves if necessary.

4 CONSUMPTION

As required.

Floor Mate

5 STORAGE

Store in cool, dry conditions in well sealed receptacles. Store under lock and key and out of the reach of children.

6 TECHNICAL DATA

Ingredients: less than 5% bleach agents based on oxygen, solvents.

pH value: 2,5

ADR/RID: not a dangerous good as defined by transport regulations.

CLP: The product is not classified according to the CLP regulation.

Even when using low-pollution products, the usual safety measures are to be observed. Keep away from children. Completely emptied canisters can be disposed of in domestic waste, or taken to a recycling centre.

7 SPECIAL NOTES

Please pay attention to our technical instructions specifically for floors and buildings under www.dr-schutz.com
