

PU Filler / Seamnomor

1 PRODUCT DESCRIPTION

Fast hardening 2-component polyester-filler.

- No shrinkage
- can be sanded very soon
- can be lacquered over with all Dr. Schutz 2K waterbased lacquers.

- Black
- only for use by professionals

2 AREAS OF APPLICATION

Filling holes and joints in floors which are solidly bound in the subsurface, generally before applying a colored design with Dr. Schutz PU Color.

Not recommended for soft floorings.

3 APPLICATION

Take out the required amount of **Dr. Schutz PU Filler** from the canister and put it onto a separate, non-absorbent flat surface. Squeeze the hardener (3%) from the enclosed hardener-tube next to the filler. Quickly mix the filler and hardener together with a Japanese spatula and fill any holes and hollows, which have been previously cleaned and abraded. After about 30 minutes the filling compound can and must be sanded down to the level of the surrounding floor. Sealing on top can be carried out immediately afterwards.

Please note:

- The surface must be professionally prepared and abraded as well as in a clean and dry condition, free of oil, wax and dust.
- Joints which are to be filled to improve the side adhesion should be cleanly cut on their sides
- Floor and material temperature must not fall below +15°C during application and drying time.
- Clean working tools and appliances mechanically after hardening.
- Read and follow work safety advice.
- When applied in areas including chair-rollers, we recommend fitting polycarbonate pads underneath after the renovation.

4 CONSUMPTION

Depends on the holes and hollows to be filled.

5 DRYING TIME

Can generally be worked on and sanded after 30 minutes.

PU Filler / Seamnomor

Low temperatures, high humidity and poor ventilation can prolong the drying time. Refrain from laying down carpets in the first 10-14 days. Furniture can be carefully placed. The area must not be wet mopped in the first three days.

7 STORAGE

Protect against frost. Store in a cool, dry place. Will keep for 24 months in unopened, original canister from the date of manufacture. Keep coating materials out of the reach of children.

8 TECHNICAL DATA

Contains: polyurethane resin, polyester resin, filler, styrene

ADR/RID: UN 3269 POLYESTER RESIN KIT, Klasse 3/III

CLP Basis GHS02, 07, 08 Danger. Contains Styrene. H226 Flammable liquid and vapour. H315 Causes skin irritation. H319 Causes serious eye irritation. H361d Suspected of damaging the unborn child. H372 Causes damage to the hearing organs through prolonged or repeated exposure.

CLP Hardener: GHS 02, 07, 09 Warning. Contains Dibenzoylperoxide. H242 Heating may cause a fire. H319 Causes serious eye irritation. H317 May cause an allergic skin reaction. H400 Very toxic to aquatic life.
