MODERN DESIGN

Whether it is an assembly hall, cafeteria or foyer - with **floor remake** rooms are modernized, refashioned and shine in their new design. All this without having to lay a new floor.

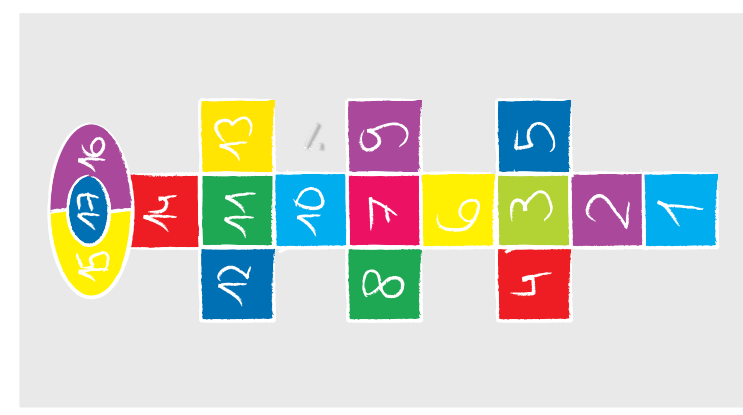

With **PU Color** and a **PU Sealer** on top old floors look like new again and are protected sustainably.

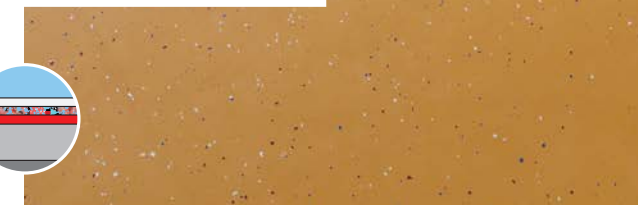

ICONS & LOGOS

Instructive and varied motifs bring fun to the floor. Field marking in sports halls, route guidance in old people's homes, or symbols like coats of arms in town halls are real eye-catchers in modern public facilities, guiding your visitors intuitively through the building.

With the **Dr. Schutz foil technique** numerous pictorial motifs can be transferred onto the floor quite simply and then protected sustainably with a PU Sealer.

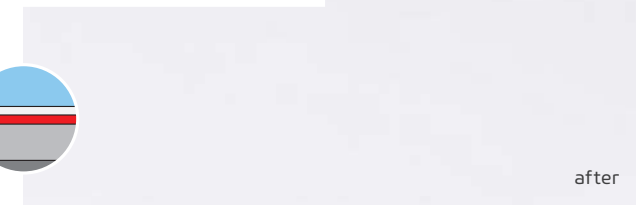

HYGIENIC & CLEAN

Old washrooms/lavatories in particular tarnish the appearance of a public building. Even glazed and polished stone and tiled floors acquire a new look with **floor remake** - fresh and clean.

With **PU Color** and a **PU Sealer** on top old floors look like new again and are protected sustainably.

floor remake

facilitates the renovation of old floors, either refreshed with a new transparent wear layer, or given a **completely new design in colour**.

FLOOR REMAKE TRANSPARENT

PU SEALER

The intensively cleaned floor is sustainably protected with a final coating of a transparent sealer!

ORIGINAL FLOOR

Scratched and damaged, ready for renovation.

FLOOR REMAKE COLOR

PU SEALER

By applying a final coat of lacquer as a transparent sealer the "new" floor is sustainably protected!

PU COLOR

The clean floor is lacquered with PU Color, according to your individual choice.

ORIGINAL FLOOR

Scratched and damaged, ready for renovation.

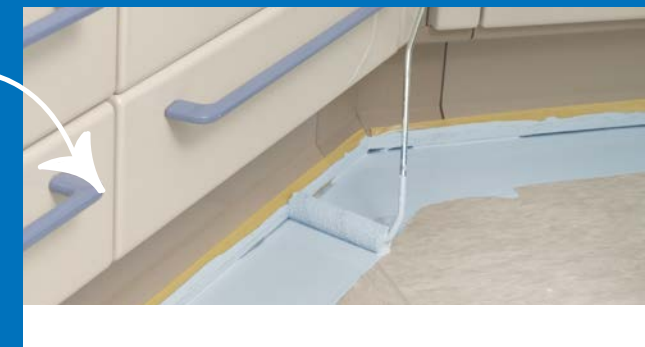

AND THIS IS HOW IT'S DONE:

Can be applied universally on PVC, linoleum, rubber, epoxy, PU as well as on many wood floors.

1 The initial situation | Heavy wear makes floors unsightly, the surfaces scratched and thereby susceptible to dirt and bacteria.

2 Lacquering the edge areas | After an intensive strip-cleaning the floor can be coated, either with a coloured or a transparent lacquer, according to your wishes.

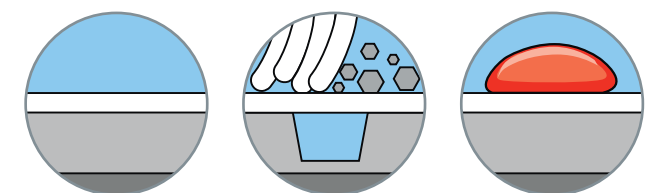

3 Lacquering the floor completely | After coating the edge areas, the entire floor is lacquered. You design it with a colour of your choice.

4 On-top-sealer provides optimal protection | After lacquering, a transparent on-top-PU sealer is applied for the protection of the floor.

COST SAVINGS & VALUE OF THE NEW SURFACE

- 50% cheaper than a newly laid floor
- Day-to-day cleaning becomes noticeably easier and less expensive
- Attractive and modern look, in colour or transparent, according to your choice
- High resistance to chemicals and disinfectants (compliant with DIN 68861)
- Especially hygienic due to sealed joints, which prevent bacteria forming (MRSA)
- Meets and exceeds HSE slip resistance guidelines of low risk for floors according to BS 7976-2 (SATRA Report). Also R 9, R 10 and R 11 compliant according to DIN 51130 and fire resistance classification (EN 13501-1).
- Suitable for chairs with castors (compliant with DIN 14085) and suitable for wet areas (compliant with DIN 51097)
- Effective longterm protection against wear and abrasion

The surface is protected, joints are hermetically sealed and the floor is resistant against dyes and chemicals.

HARDLY ANY BUSINESS INTERRUPTION & BETTER FOR PEOPLE AND THE ENVIRONMENT

- Not tearing out old floors means no dirt or noise
- Minimal business interruption, as renovation is possible in 1-2 days
- No disposal of old floors means saving resources (water, energy) because there is no need for regular strip-cleaning / initial care
- All PU sealers produce very low emissions (EC 1 R), the cleaners are fully biodegradable
- Also suitable for food areas and children's play areas

Tested and certified by leading institutes.

OUR PROMISE OF QUALITY FOR YOUR SAFETY

- Perfected systems: since launching the Dr. Schutz floor remake systems over 45 million sq.metres worldwide have been successfully renovated and sealed
- Tested and deemed good: all lacquer systems have the general authorization of planning departments and building controls in Europe, as well as further certification
- Floor remake is used exclusively by trained and certified service providers
